GET THE RIGHT SIZE

How to measure:

- 1. Chest/Bust: With arms down at your sides, measure around the largest part of the chest, generally across the nipples.
- 2. Waist: Measure around natural waistline, allowing tape measure to sit comfortably.
- 3. Inseam: With feet shoulder-width apart, measure from just below your crotch to the bottom of your ankle.

Tips for taking accurate measurements:

- · It's best to have someone else help do the measuring.
- Use a cloth measuring tape. If you don't have one, use a cord (or an NRS strap!) and transfer that to a tape measure.
- Measure in your street clothes; we size technical outerwear pieces like dry suits and dry tops to include room for layering underneath.
- · Stand up straight and relax.

Suggestions on sizing when your measurements cross into different size categories:

- With wetsuits, your weight is the best "tiebreaker" when measurements cross sizes. Remember, wetsuits need to fit snugly to be efficient at excluding water and holding in warmth.
- In looser fitting garments like drysuits, splash jackets, etc, look first at the height, then at the weight for a tiebreaker.
